PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science graduate (2026) with hands-on experience in full-stack web and mobile application development, machine learning model deployment, and RESTful API design. Proficient in the MERN stack, Python-based ML pipelines, and cloud deployment workflows. Built and shipped production-grade projects integrating AI/ML features with scalable backend architectures. Seeking an entry-level Software Engineer, Full-Stack Developer, or AI/ML Engineer role at a growth-oriented technology organization.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), C++, Java
Frontend	React.js, React Native (Expo), HTML5, CSS3, Responsive UI/UX Design
Backend	Node.js, Express.js, Flask, RESTful APIs, JWT Authentication, Middleware Design
Databases	MongoDB (schema design, aggregation), SQL, Mongoose ODM
ML / AI	Scikit-learn, Pandas, NumPy, TensorFlow (basics), NLP Fundamentals, EDA, Feature Engineering, Regression Modeling
Tools	Git, GitHub, Postman, Swagger, Power BI, VS Code
Deployment	Render, Cloud Hosting, Environment Configuration
Concepts	Data Structures & Algorithms, OOP, MVC Architecture, Agile Workflows, API Documentation

PROJECTS

AI Personal Health Assistant

React Native, Node.js, Express.js, MongoDB, JWT

Final Year Project — Full-Stack Mobile Application

- Engineered an end-to-end cross-platform mobile application delivering personalized 6-day workout and fitness plans based on dynamic user profiles (age, height, weight, and goals), achieving a fully functional MVP.
- Architected and implemented secure RESTful APIs using Node.js and Express.js with JWT-based authentication, role-based middleware, and environment-driven configuration for production readiness.
- Designed scalable MongoDB schemas to handle user data, health metrics, and dynamically generated workout plans with Mongoose ODM.
- Built a polished React Native (Expo) frontend with clean UI/UX, dynamic routing, and component-level state management for seamless cross-device user experience.
- Integrated API testing and documentation using Postman and Swagger, ensuring robust validation and developer-friendly endpoint reference.
- Architected the system to be AI-ready with a modular chatbot interface planned for future workout and nutrition recommendation features using NLP models.

TripNow | AI-Powered Travel Planner

React.js, Node.js, Express.js, MongoDB, REST APIs

Full-Stack AI Travel Planning Platform

- Developed a full-stack AI-powered travel planning platform enabling users to discover destinations, generate personalized itineraries, and manage trip bookings through an interactive, modern interface.
- Built a fully responsive React.js frontend with reusable component architecture, dynamic client-side routing, and optimized state management for smooth user interactions across all devices.
- Designed and implemented Node.js and Express.js backend APIs handling trip management, booking workflows, user authentication, and structured user data operations.
- Integrated AI-driven trip recommendation and itinerary generation features, enhancing personalization and reducing manual trip planning effort for end users.
- Added real-time weather forecasting integration, trip budgeting tools, and PDF trip summary export functionality to improve end-to-end usability.
- Designed scalable MongoDB database schemas for managing destinations, user preferences, trip details, and booking records efficiently.
- Deployed the application on cloud infrastructure with performance optimization for seamless cross-device accessibility and reduced load times.

Smart House Price Prediction — ML Web App

Machine Learning + Full-Stack Deployment

Python, Scikit-learn, Flask, Render

- Built an end-to-end ML web application that predicts residential house prices based on user-provided property features, combining data science and full-stack deployment.
- Performed comprehensive data preprocessing, exploratory data analysis (EDA), and feature engineering; trained and evaluated a regression model using Scikit-learn, achieving competitive prediction accuracy.
- Exposed ML model predictions via Flask RESTful APIs, enabling real-time inference from a browser-based frontend interface.
- Deployed the backend, API layer, and trained model on Render cloud platform, demonstrating end-to-end ownership from data pipeline to production deployment.

EDUCATION

Babu Banarsi Das University, Lucknow
Bachelor of Technology in Computer Science and Engineering

Sept 2022 – June 2026
GPA: 7.8 / 10.0

ACHIEVEMENTS & CERTIFICATIONS

-
- Completed Data Science & AI Project-Based Summer Training Program — BBD University, Lucknow.
 - Active open-source contributor and personal project builder; repositories maintained on GitHub with structured documentation.
 - Strong self-learner with hands-on experience across the full software development lifecycle: ideation, development, testing, and deployment.
